Foreword

For the past six years, government has been implementing the Universal Post Primary Education and Training (UPPET) with an objective of increasing access to quality secondary education. To further this, in 2011, government undertook to implement the Universal Post O'Level Education and Training (UPOLET) as a strategic intervention aimed at increasing access at Post S.4 education level in order to consolidate the gains and successes so far registered under UPE and USE programmes. The two programmes have greatly transformed education and skills development in the country through; expanding access and improving attendance in secondary education and BTNET; adding value to the sustainability of UPE; developing competencies that provide access to the global economy and the potential this offers for national development; reducing high cost of education; increasing equitable access to secondary education and BTNET for special groups and ensuring the achievement of the Millennium Development Goal (MDG) number 3 of Gender parity by 2015.

However, Implementation of such programmes is affected by dynamic factors like enrolment and thus the need for periodic review through annual headcount exercises that are aimed assessing and monitoring the changing environment in the various schools and institutions. In line with this, the Ministry of Education and Sports together with the Office of the President planned and conducted the 2013 headcount exercise on the 10th April 2013. The enumerators were the Officers from the Office of the President. The target respondents were the headteachers/principals while students were physically headcounted. The information included in this publication is an output of the analysis done on the data gathered from the April 2013 national headcount exercise that was conducted in all USE/UPPET and UPOLET institutions.

I wish to thank all those that made this publication a reality. Special thanks go to members of the Education Development Partners (EDPs) for their financial and technical support. My thanks also go to the field officers, the Internal Security Organization (ISO), the District/Urban Local Government officers, Headteachers and the Ministry of Education and Sports technical team for their contribution to the successful execution of the exercise.

An open invitation is hereby extended to you to make comments on this publication. It is worth noting that the comments you make will improve our subsequent publications.

Dr. Rose Nassali Lukwago
PERMANENT SECRETARY

Executive Summary

1.0 Introduction

As you may recall in 2007, the government of Uganda commenced the Universal Post Primary Education and Training (UPPET) commonly referred to as Universal Secondary Education (USE) with the overall objective of increasing access to quality education and skills development. In 2011 the government introduced the Universal Post O'level Education and Training (UPOLET) as a continuation of the UPPET programme. The two programmes have greatly transformed education and skills development in the country through; expanding access and improving attendance in secondary education and BTVET; adding value to the sustainability of UPE; developing competencies that provide access to the global economy and the potential this offers for national development; reducing high cost of education; increasing equitable access to secondary education and BTVET for special groups and ensuring the achievement of the Millennium Development Goal (MDG) number 3 of Gender parity by 2015.

However, implementation of such programmes is affected by dynamic factors like enrolment and thus the need for periodic review through annual headcount exercises that are aimed at assessing and monitoring the changing environment in the various schools and institutions. It is in line with the above that the Ministry of Education and Sports on the 10th April 2013 organized the National Headcount exercise. The Office of the President (Internal Security Organization) conducted the enumeration exercise while the headteachers/principals were the primary respondents during the exercise.

Table 1 Targeted schools/institutions and their returns

Type of School/Institution	Government aided			Partnership			Total		
	Target	Return	%	Target	Return	%	Target	Return	%
USE	245	228	93.06%	615	610	99.19%	860	838	97.4%

2.0 Results

The results of the national headcount exercise are presented as follows:

2.1 Universal Secondary Education (USE)

Eligible students under USE schools (S.1-S.4) totaled 806,992 of whom 434,473 (54%) were male and 372,519 (46%) female resulting in 6% (5% male and 7% female) increment from last year 2012. The results indicate that the 925 government schools have 471,726 students while the 870 private schools have 335,266 students.

A total of UGX 35,098,268,000/= per term is required for the 806,992 (471,726 government and 335,266 private) eligible students at a rate of UGX 41,000/= (Government schools) and UGX

47,000/= (Private schools). This translates into a total annual requirement for FY 2013/14 of UGX 105.2bn under USE for both public (UGX 58bn) and private (UGX 47bn) participating schools up by UGX 8.2bn from the UGX 97bn for FY 2012/13.

2.2 Universal Post O'level Education and Training (USE/UPOLET)

Eligible students under UPOLET schools (S5 and S6) totaled 67,951 of whom 46,066 were male and 21,885 female. This translates into a 76% increase (due to the introduction of a second class S6 and new S5 students) in UPOLET enrolment 2013 from 38,474 recorded in 2012. The results indicate that the 697 government schools have 47,128 students while the 260 private UPOLET schools have 20,499 students.

A total of UGX 5,540,195,000/= of which UGX 3,770,240,000/= is for government students and UGX 1,769,955,000/= for private students per term is required for the 67,951 eligible students at a rate of UGX 80,000/= for government schools and UGX 85,000/= for private schools respectively. This translates into a requirement of UGX 16.6bn for the FY 2013/14.

2.3 P.7 enrolling BTVET and UPOLET

P.7 enrolling BTVET Institutions had a total count of 8,206 (6,462 Male and 1,744 Female) eligible students representing a 3% increment from last year.

A total of UGX 1,641,200,000/= per term is required for the 8,206 (6,775 government and 1,431 private) eligible students at a rate of UGX 200,000/= (government schools and private schools) resulting into an estimated budget requirement of UGX 5bn for both public and private participating schools for FY 2013/14 up by 1.2% from last Financial Year 2012/13.

2.4 Universal Post O'level Education and Training (BTVET/UPOLET)

Eligible students in UPOLET technical institutions totaled 6,132 of whom 5,290 are male and 842 female. The results also indicate that there were 2,320 students in the UPOLET health institutions of whom 1,128 are male and 1,192 female.

A total of UGX 3,499,128,000 / = of which UGX 2,538,648,000/= is for Technical Institutes and UGX 960,480,000/= is for Health Institutions per term is required for the 8,452 eligible students in both technical and health post O'Level institutions. The total annual budget requirement therefore is UGX 10.4bn up from UGX 2.6bn used last financial year 2012/13.

2.5 Challenges

The two programmes (USE and UPOLET) are still faced with the following challenges:

- i. Drop out and repetition rates (12%) are still high, largely due to the lack of a tracking mechanism for transfers. HIV/AIDS (prevalence to both teachers and students) is also still at-large and is considered to be one of the causes that are contributing to rising dropout rates, absenteeism (both teacher and student), repetition and poor academic performance.
- ii. Congestion in UPPET schools is high with almost 34% of the schools accommodating over 60 students in a class. The policy is 60 students per class. The programmes we have in place, like the World Bank (APL1) and ADB are expected to address this problem in the medium term.

CHAPTER ONE

1.0 Introduction

For the past seven years, government has been implementing the Universal Post Primary Education and Training (UPPET) with an objective of increasing access to quality secondary education. To further this, in 2011, government undertook to implement the Universal Post O'Level Education and Training (UPOLET) as a strategic intervention aimed at increasing access at Post S.4 education level in order to consolidate the gains and successes so far registered under UPE and USE programmes. The two programmes have greatly transformed education and skills development in the country through; expanding access and improving attendance in secondary education and BTJET; adding value to the sustainability of UPE; developing competencies that provide access to the global economy and the potential this offers for national development; reducing high cost of education; increasing equitable access to secondary education and BTJET for special groups and ensuring the achievement of the Millennium Development Goal (MDG) number 3 of Gender parity by 2015.

The government committed itself to subsidizing costs at secondary school level by paying school fees, providing textbooks and other instructional materials for both students and teachers, meeting the costs of co-curricular activities, school administration and maintenance.

Figure 1 Main Goals of the UPPET Programme

- (i) *Expanding access and improve attendance in secondary education and BTJET;*
- (ii) *Adding value to the sustainability of UPE;*
- (iii) *Introducing students to formal reasoning, problem-solving skills and occupationally relevant content and application of knowledge;*
- (iv) *Developing competencies that provide access to the global economy and the potential this offers for national development;*
- (v) *Reducing high cost of secondary education and BTJET;*
- (vi) *Increasing equitable access to secondary education and BTJET for special groups; and,*
- (vii) *Developing the value of UPPET through;*
 - *Enhancing positive attitudes and intrinsic value of education;*
 - *Contributing to human resource development and ability to generate income;*
 - *Increasing knowledge-based economies in the context of globalization; and,*

Following the success of the Universal Post Primary Education and Training (UPPET) for lower Secondary and Post P7 Vocational Education and Training in 2007, Government of Uganda introduced Universal Post O'Level Education and Training (UPOLET) programme in 2012. This policy for free post O' level is in line with the National Development Plan (NDP) provision under Human Resource Development and a prolongation of the UPPET/USE programme to cater for Ugandan students who successfully complete and pass their Uganda Certificate of Education (UCE).

Figure 2 Main Goals of the UPOLET Programme

- (i) *Increasing equitable access to post 'O' level education and training*
- (ii) *Assuring achievement of the Millennium Development Goal (MDG) number 3 of Gender parity by 2015;*
- (iii) *Enhancing the sustainability of UPPET;*
- (iv) *Reducing the high costs of Post 'O' level Education*
- (v) *Improving the quality and efficiency of Post 'O' level Education through provision of teachers, pedagogical infrastructure, instructional materials, and other attendant school facilities; and*
- (vi) *Enhancing public private partnership in the provision of Post O- level Education.*
- (vii) *Consolidating the gains (literacy, academic and social skills) from UPPET for further education and training at tertiary and university levels).*

As part of the implementation strategy for the two programmes, the Ministry of Education and Sports conducted a national headcount exercise of eligible students in all schools and institutions that implement the Universal Post Primary Education and Training (UPPET) and Universal Post O'Level Education and Training (UPOLET) programme on the 10th April 2013.

1.1 Objective the USE/UPPET Headcount 2013

Against the above background, the number of students attending secondary education, particularly those under the USE/UPPET programme has to be ascertained every year for the purposes given below.

- i. To establish the actual number of students enrolled under USE/UPPET programme for informed decision making and planning resource allocation to the participating education institutions i.e. private and government.
- ii. To assess equity in access;
- iii. To assess drop out;
- iv. To assess quality of learning and efficiency; and
- v. To get feedback from schools/institutions.

1.2 Structure of the report

The report is divided into 4 chapters. Chapter one presents the overview of the USE/UPPET headcount exercise. It also presents the objectives of the headcount. Chapter 2 presents the exercise methodology including analysis of the data collected during the study. Findings from the Headcount 2010 exercise are presented in Chapter three. This account includes results of analysis of both USE and BTVET quantitative and qualitative data. Chapter 4 gives a discussion on challenges of the exercise and UPPET programme and ends by presenting conclusions and major recommendations from the exercise.

1.2 *Situational analysis*

A situational analysis was undertaken to inform the restructuring exercise.

1.2.1 *Demographic Trends*

According to the 2011 state of the world population report by the UN Fund for Population Activities (UNFPA), UGANDA's total population grew to 34.5 million in 2011, with the proportion of females and males being the same at 17.3 million each. This is up from 33.8 million Ugandans in 2010. It also indicates that Uganda's annual population growth rate has fallen from 3.3% in 2010 to 3.1% in 2011.

A doubling of the population took place between 1980 and 2002 (from 12.6 million to 24.4 m), and is predicted to increase further in the next 20 years (54.9m by 2025), and to 103m by 2050. This means that Uganda's population is rising at an annual rate of 3.4%, equivalent to an additional 1.2m per annum. *Source: (MDG Uganda Report 2005/6).*

Regionally, Uganda's population growth rate is the same as that of Tanzania. However, it is above that of Burundi at 1.95, Kenya at 2.75 and Rwanda at 2.9%. The report also points out that the fertility rate of Ugandan women has fallen from about 6.7 in 2005 to 5.9 children per woman.

This is the first time in four decades that Uganda's fertility has gone down to six children per woman. Also, the life expectancy of Ugandan men and women has gone up to 54 and 55 years respectively. This is up from 53.4 and 54.8 years in 2010. However, the country urban-based population has remained at 13%.

The school age population (4 to 18years) is expected to continue to grow at a rate of 3.4% per year over the next ten years. This projection reflects that half of the cohort reaching age 12years each year need to access secondary education.

1.2.2 *Post Primary Trends*

In 2002, enrolments stood at 655,951 and by March 2004, it had increased to 697,507 with 50% attending private secondary schools. Currently, the enrolment stands at 1,258,084. However, whereas enrolment in absolute terms is increasing, the enrolment of girls is still lagging behind that of boys. Likewise in Business, Technical, Vocational Educational Training (BTVET), total enrolment has steadily grown from 20,314 students in 2002 (prior UPPEP) to 40,428 students in 2011 representing a 99% increase in total enrolment over a nine-year period. The government has also registered success in narrowing the gender enrolment gap in BTVET institutions with an increase in female enrolment share from 23.7% in 2002 to 30% in 2011.

The introduction of UPPEP/USE in 2007 immensely contributed to a substantial increase (28.2%) in the secondary school gross enrolment from the pre-USE total of 728,393 in 2005 to 1.1 million in 2009. Between 2007 and 2012, the UPPEP/USE programme recorded a significant average rise of 8.5% for the S1 intake.

In addition, the gender enrollment gap in terms of secondary school enrolment has narrowed tremendously, with the proportion of girls rising to 45% in 2011 from 42% in 2007. USE has averaged a 44 percentage point proportion (20% in 2007, 34% in 2008, 44% in 2009, 56% in 2010 and 65% in 2011) of the overall O'level enrolment in secondary schools over the past five years as shown in the figure beside.

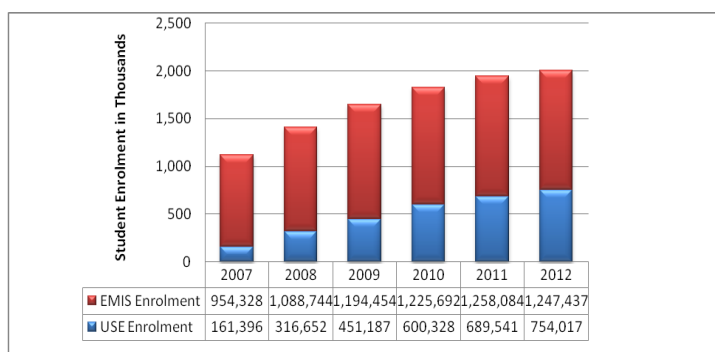

Figure 3 Share of USE to national enrolment

Table 2 UPPET/USE at a glance

GOALS/TARGET	INDICATOR	CURRENT STATUS		Progress of goal or target
Expanding access and improve attendance in secondary education and BTVET;	Net Enrolment ratio	23.8%		↑ Has Potential to going up
Adding value to the sustainability of UIPE;	Transition rate to S1	70%		↑ Has Potential to going up
Introducing students to formal reasoning, problem-solving skills and occupationally relevant content and application of knowledge;	Promotion rate	S1 to S2	95.2%	It has Probably stabilized →
		S2 to S3	95.6%	
		S3 to S4	86.8%	
Reducing high cost of secondary education and BTVET;	Government expenditure on education	as % of GDP	4.4	↑ Has Potential to going up
		as % of total government expenditure	16.8	
Developing competencies that provide access to the global economy and the potential this offers for national development;	Survival Rate	72%		↑ Has Potential to going up
Increasing equitable access to secondary education and BTVET for special groups; and,	STR	25%		It has Probably stabilized →
Developing the value of UPPET through; Enhancing positive attitudes and intrinsic value of education; Contributing to human resource development and ability to generate income; Increasing knowledge-based economies in the context of globalization; and, Enhancing government policy on poverty eradication.	Literacy rate Youth (15-24)	71.2%		↑ Has Potential to going up
	Literacy rate Adult (15+)	61.9%

1.2.3 Macro-economic

The Long-Term Expenditure Framework (LTEF) seeks to align resources towards rural development and sustain them with the provision of social services like education. The Ministry of Finance, Planning and Economic Development (MoFPED) anticipates that the budget for education would increase by 25% between FY 2008/09 and 2012/13 and that this trend will be driven by rapid GDP growth. Government expenditure towards education is currently at 13.1% of the overall national budget and the share of the secondary sub sector is 23% of education budget.

1.2.4 GoU Policies and Plans

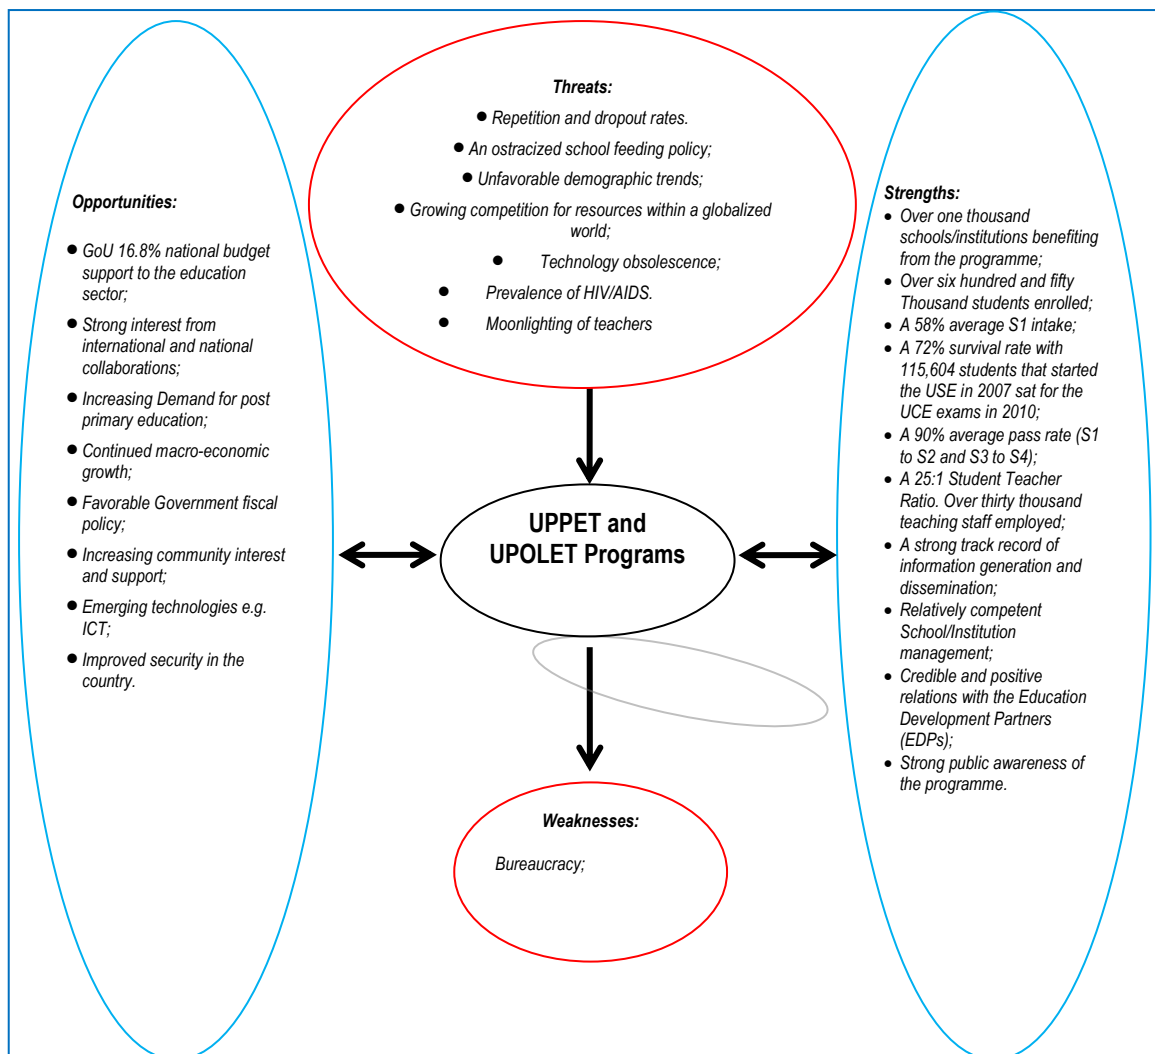

The government white paper on education is the basis of the official policy on the purposes and programs of education. As articulated in the White Paper, secondary education continues to be the supreme guidance for the education sector. Secondary education aims at contributing to the building of modern, integrated, self-sustaining and independent national economy.

- i. **Joint Assessment Framework;** The Joint Assessment Framework (JAF) was introduced in the Ministry of Education and Sports in FY 2008/09. The government of Uganda is currently implementing JAF IV due for final evaluation in December 2012. Since inception, the evaluation results have been the basis of release of budget support funds to the Education and Sports Sector by Education Development Partners (EDPs). The main objective of these targets is to support MoES improve the impact of its spending through realistic and prudent targeting of the budgetary resources as well as enhanced efficiency and effectiveness in the delivery of Sector services.
- ii. **Poverty Eradication Action Plan (PEAP);** Government through the Poverty Eradication Action Plan (PEAP) focuses upon economically empowering the community through its strategic objective: better educated society. The PEAP matrix includes the following *outcome indicator: Post-Primary Gross Enrollment % (disaggregated by gender)*. This is a precisely defined indicator. It is defined by gross enrolment percentage of students in secondary schools and tertiary institutions. It is the number of population aged 13-18years in schools and institutions divided by those aged 13-18years in the general population. It is disaggregated by gender. Its rationality is to measure whether the resources were fully utilized or wasted. This is indicated by students enrolling in tertiary institutions. It assumes that there is correct information from institutions.
- iii. **Millennium Development Goals;** Since endorsing the Millennium Development Goals (MDGs) in 2000, Uganda remains committed to ensuring that all activities leading to the achievement of these critical goals are fully implemented as envisaged so as to accelerate poverty eradication and national development. With regard to education related MDGs (i.e. Goal 2: Achieve Universal Primary Education and; Goal 3: Promotion of gender equality and women empowerment), the Ministry of Education and Sports continues to spearhead efforts geared towards their achievement. The MDGs' initiative in the sector is a partnership between the Government of Uganda (GoU) and Education Development Partners (i.e. donors, NGOs, the private sector and the recipient communities).

- iv. **Education For Goals (EFA)**The Education For All (set in Jomtein in 1990 and reaffirmed in Dakar in 2000) include completion of free and compulsory basic education of good quality, equitable access by all children, elimination of gender disparities, and achievement of measurable learning outcomes, especially in literacy, numeracy, and essential life skill.

1.2.5 USE/UPPET SWOT Analysis

The USE/UPPET programme is now in its fifth year of implementation and a scan of its environment shows several strengths and opportunities attained amongst others against pertinent weaknesses and threats. The summary below shows the SWOT analysis of the programme through the years since its inception in 2007.

CHAPTER TWO

2.0 Methodology

2.1 Data collection, processing and report writing

A combination of methods were used in data collection during this headcount exercise; this included (i) collection of secondary data from previous databases (ii) collection of primary data using appropriate field data collection procedures and tools (iii) analysis of the data collected (iv) making presentations of the headcount expectations to the stakeholders. These are discussed below.

2.1.1 Primary Data Collection

The 2012 headcount exercise student enumeration was done by officers of the Office of the President known as the Gombolola Internal Security Officers (GISOs) while the target respondents were the headteachers/principals.

A list of all the Schools/Institutions involved in USE/UPPET and UPOLET programmes was availed by the Secondary and BTVET departments of the Ministry of Education and Sports. A scan through indicated that there is a total of 1,800 USE participating secondary schools distributed across 12 regions. Against the above distribution, ownership of the schools revealed that at least 922 schools were government aided while 863 were private. The UPOLET secondary schools are 955. There are also 62 BTVET technical schools and community polytechnics (P7 Leaving), implementing the UPPET program with 46 being government aided while 16 private. Under UPOLET (O'Level Leaving BTVET) there are 58 BTVET technical institutes and 8 Health institutions which are all government aided.

This report presents the provisional results of the national headcount exercise. The targeted schools/institutions are summarized in Table 4 below.

Table 4 Showing number of targeted Schools/Institutions

Category of School/Institution	Government aided	Partnership	Total
USE	245	615	860
USE/UPOLET	699	260	959
Secondary Sub total	944	875	1819
BTVET/UPOLET	53	0	53
BTVET/UPPET	42	15	57
HEALTH UPOLET	8	0	8
BTVET Sub total	103	15	118
Grand Total	1,047	890	1937

In establishing eligible students, the enumerators (GISOs) physically counted the number of students present. In addition, proven absentees (students who are eligible and enrolled in the school but were absent on the headcount day) were ascertained from registers, fellow students, student's files and class teachers.

The headcount exercise in Secondary Schools and BTVET Institutions was conducted on the same day (14th April 2011) to minimize the possibilities of double counting.

The Senior One to Four (S1-S4) and Year One to Three (Y1-Y3) BTVET students' headcount exercise was conducted in all Secondary Schools and BTVET Institutions which are in partnership with Government to implement USE/ UPPET programme.

In view of the above categories of schools, a segmented data collection approach was used. This approach was adopted because (a) the headcount exercise was going to emphasize quantitative data collection for which key requirements in terms of numbers were going to be obtained from different types of institutions/schools (b) rigorous statistical analysis would be expected from the field data collected.

Headcount tools/Instruments and documents

These included:-

1. *List of Participating Schools*
2. *USE Headcount Form A (To be filled by GISOs at the school)*
 - *Yellow color* *UPOLET Secondary*
 - *Pink color* *UPPET/USE (Non UPOLET)*
 - *Blue color* *UPPET (Non UPOLET) P7 Enrolling BTVET Institutions*
 - *Green color* *UPOLET O'level Enrolling BTVET and Health Institutions*
3. *Regional and District Summaries*
 - *Form B1: District Summary (to be filled by DISOs)*
 - *Form B2: Regional Summary (to be filled by RISOs)*
4. *Distribution Form*
 - *USE Form B5: DISOs to GISOs*
5. *Headcount Form A Instructional Manual*
6. *Head Count Guidelines and Standing procedures for the enumerators (GISOs)*
7. *Head Count Information Sheet 8. Monitoring team report format*

Data collection tools were thus designed in conformity with the needs of the exercise and were used to facilitate the collection of information on (i) Number of students physically counted; (ii) Number of students proven absent; (iii) number of teachers, and (iv) and other key variables such as: - Enrolment for other classes/years, Classrooms, Laboratories, teachers /Instructors.

The headcount being both a quantitative and qualitative investigative method, an all inclusive assessment was used to gather data and information using techniques and materials like direct observation, admission books, registers and student identity and report cards.

Field Data Collection

A team of Gombolola Internal Security Officers (GISOs) were selected as the Headcount exercise enumerators; they were trained for a day. The training included orientation in data collection techniques and the context of the headcount exercise. To ensure that the enumerators had basic knowledge about the exercise, the training curriculum included basic information on the subject matter such as definitions of terms and concepts in use in the data collection tool.

The enumerators had the following standing orders on the headcount day;

STANDING PROCEDURES FOR THE ENUMERATOR:

- i. Check presence of daily attendance on the notice boards.
- ii. Check registration beginning of Term 1 2011.
- iii. Check attendance register as of beginning day of Term 1.
- iv. Assemble S1/Y1, S2/Y2, S3/Y3 and S4/Y4 students in their respective classrooms/streams
- v. Check 3rd Term 2010 S3 report cards (In case of S4).
- vi. Conduct a sample roll call.
- vii. Headcount S1/Y1, S2/Y2, S3/Y3 and S4/Y4 students (only those who sat for PLE for the given years i.e 2007, 2008 2009 and 2010 respectively.
- viii. After head count, the head teacher/Principal authenticates the forms by signing on every page of the form.
- ix. The Enumerator counter signs the forms.
- x. The Enumerator (GISO) submits the forms to the DISO
- xi. The DISOs will submit the forms to their respective RISOs
- xii. Then the RISOs will submit the headcount forms to the MOES Education Planning Department, Statistics Section.

Direct observation

Observation of the school infrastructure, admission books, registers, student identity and report cards. These tools were used in order to (a) gauge the current level of beneficiaries' that satisfy of UPPET requirements (b) ascertain the grades attained by students during PLE (c) provide a reliable basis for eligibility into the programme. These parameters are also included in the UPPET policy document.

2.1.2 Secondary Data Collection

Secondary data was collected through desk reviews and involved reviewing documents and data originating from the UPPET policy, Secondary and BT/VET departments, Education Sector Review Reports, Uganda Education Statistics Abstracts. Some data was also obtained from the EMIS database.

2.2 Data processing and analysis and report writing

An assortment of Ms ACCESS and Ms EXCEL computer programmes were designed for data capture. Thereafter, appropriate tables were drawn and queries run in order to generate different summaries. Charts were drawn using EXCEL spreadsheet software.

2.4 Constraints experienced in the exercise

- i. Newly created administrative units meant that the affected schools/institutions had changed their location. This delayed the analysis and report writing because data collected had to be correctly tagged to the new administrative units.
- ii. Validation of the headcount information was done manually using the data collection forms against the data entered into the system. This exercise had to be done to perfection and this required a lot of concentration and time.
- iii. Verification of the data collected was done late and the scope of the exercise was limited by the resource envelope.
- iv. As shown in the findings detailed later in this report, some schools were not head counted or reported null information.

CHAPTER THREE

3.0 Findings

3.1 Introduction

A total of 1,719 (944 Government Aided and 875 PPP) Secondary schools participated in the UPPET/UPOLET National Headcount 2013 exercise. Findings indicate that USE schools had a total of 806,992 (471,726 Government Aided schools and 335,266 PPP schools) eligible students while the 957 UPOLET benefiting secondary schools had a total of 67,951 (47,128 in Government Aided and 20,823 in PPP schools) students.

Year of Joining USE	Government Aided		Public Private Partnership		Overall	
	Schools	Enrolment	Schools	Enrolment	Schools	Enrolment
2007	861	455,244	289	135,929	1,150	591,173
2008	16	6,637	63	29,916	79	36,553
2009	7	2,181	109	51,116	116	53,297
2010	15	3,679	124	48,782	139	52,461
2011	11	2,239	150	46,734	161	48,973
2012	11	1,338	132	21,295	143	22,633
2013	23	408	8	1,494	31	1,902
Grand Total	944	471,726	875	335,266	1,819	806,992

3.2 Universal Secondary Education (USE)

Eligible students under USE schools (S.1-S.4) totaled 806,992 of who 434,473 were male and 372,519 female resulting in 9% (8% male and 10% female) increment from last year. The results indicate that the Government Aided schools have 471,726 students while the PPP schools have 335,266 students eligible for USE.

USE intake in senior one has been gradually increasing since inception of the program in 2007. The program was commenced with a total of 161,396 (92,388 male and 69,008 female) students in 2007. In 2008, the senior one intake increased to 163,758 (92,459 male and

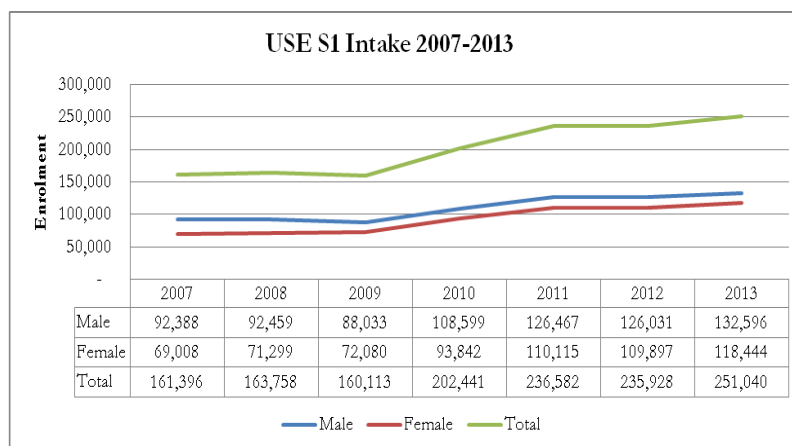

Figure 4 Showing senior one intake trends

71,299 female) with females increasing by 3%. However, due to a decline in PLE pass rate in 2008 from 86% in 2007 to 81%, some of the students failed to qualify for the program in 2009 leading to an intake of 160,113 (88,033 male and 72,080 female). In 2010, the senior one intake increased to 202,441 and further rose to 236,582 (126,467 male and 110,115 female) in 2011 an average rise of

20% between 2009 and 2011 following interventions like construction of new seed schools. However, the senior one intake slightly decreased in 2012 with 235,928 (126,031 male and 109,897 female) most probably on the account that the program had began to stabilize due to the vigilance of the different stakeholders in curbing irregular practices like wrong reporting and admission of students into the programme. This year 2013, the S1 intake has witnessed a 6% increase from 235,928 (126,031 male and 109,897 female) in 2012 to 251,040 (132,596 male and 118,444 female) as shown in Figure 4.

	Female					80.8%	84.1%	83.7%	80.9%	
	Total					83.2%	87.2%	86.4%	82.9%	

Results from Table 6 indicate that;

- i. The number of PLE candidates with aggregates 4-28 2008 registered the highest decline from 301,511 (2007) to 272,356 (2008) which represented a 10% decline in PLE performance, compared to 301,775 in 2006) and 301,511 in 2007. In 2009 there was a magnificent rise of 29% with 351,178 pupils passing within aggregates 4-28. To date, the

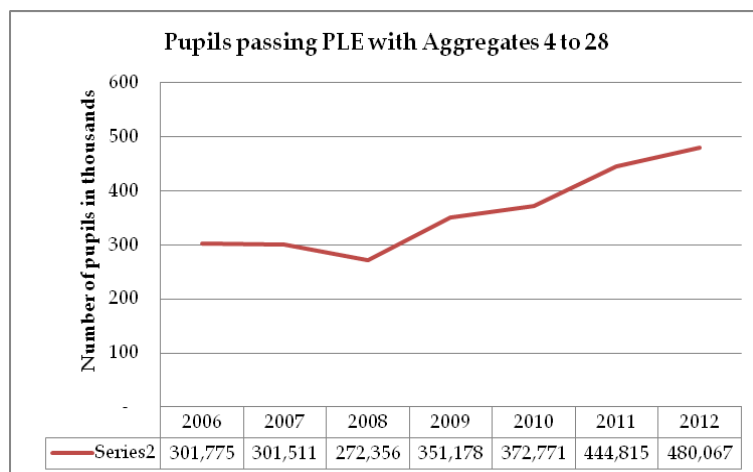

Figure 5 Pupils passing PLE with aggregate 4-28

number of PLE candidates passing within aggregates 4-28

recorded a significant average increment of 6% since 2009. The year 2011 and 2012 registered significant increment in USE eligible PLE candidates with a percentage gain of 19% (2011 from 2010) and 8% (2012 from 2011) this is can be attributed to increase in awareness of the USE eligibility criteria for senior one intake that requires a PLE candidate to have passed with aggregates 4 to 28.

- ii. The absolute number of eligible students enrolling in senior one decreased from 163,758 (92,459 Male and 71,299 Female) in 2008 to 160,113 (88,033 Male and 72,080 Female) in 2009. However, in 2010 the S1 intake increased to 202,441 (108,599 Male and 93,842 Female) an addition of 42,328 students from 2009. In 2012, the USE/UPPET

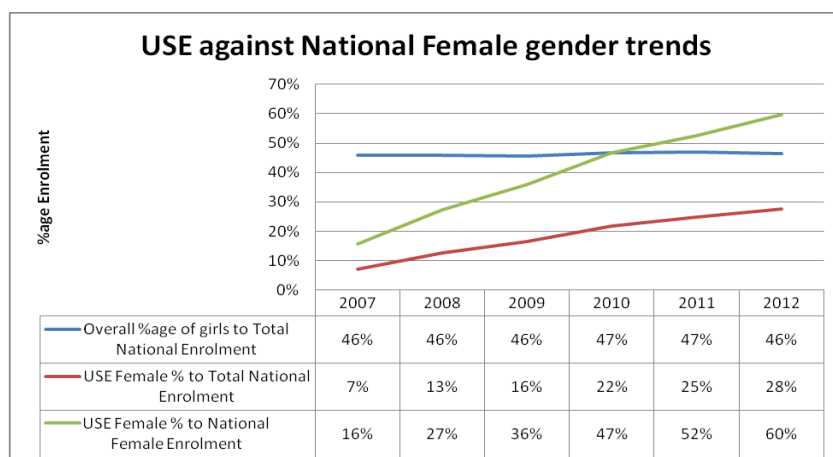

Figure 6 Showing USE female students against National enrolment USE 2007 to 2013

programme witnessed a slight decline in subscription with 235,928 from 236,582 students in 2011 in senior one. However results reveal an average increment of 6.7% per year with an 8.2% average increment for girl students accessing secondary education through the USE/UPPET program per year since 2007. This is due to the improvement in PLE performance as shown in (i).

iii. The 2013 headcount results reflect a transition rate of;

- 91.3% (91.3% male and 91.3% female) from S.1 to S.2 a 1.5% (2.1% male and 0.7% female) decline from last year;
- 88.5% (89.2% male and 87.6% female) from S.2 to S.3 this indicates a 2.6% decline (3.4% male and 1.8% female);
- 82.9% (84.5% male and 80.9% female) from S.3 to S.4. This also declined by 3.5% (4.0% male and 2.7% female)

Gain/Loss Transition Rates 2012/13			
	S1 to S2	S2 to S3	S3 to S4
Male	-2.1%	-3.4%	-4.0%
Female	-0.7%	-1.8%	-2.7%
Total	-1.5%	-2.6%	-3.5%

These trends indicate that girl students' transition rate has slightly improved.

- iv. **USE survival rate** stands at 72% (75% male and 69% female). This indicator relates to the USE cohort that is USE students that started S.1 in 2010 and managed to make it to S.4 in 2013. This indicator positively reflects the contribution USE/UPPET has on the economic development of the country as these students are equipped through their years at school to be the future human resource. The remaining 26% of students have either repeated a class, transferred to non-USE schools else dropped out of school. The graph below shows the number of students dropping from the USE cohort of 2009 to 2012.

USE survival rate S1-S4				
	2010	2011	2012	2013
Male	74%	74%	79%	75%
Female	69%	69%	73%	69%
Total	72%	72%	76%	72%

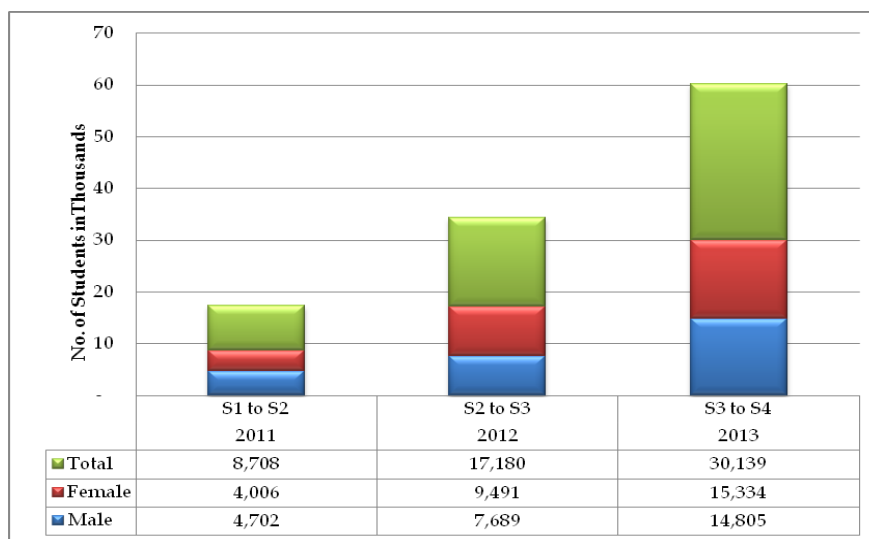

Figure 7 Showing USE Students lost in the 2010-2013 Cohort

- v. **USE Dropout and/or Transfer:** Results indicate that 8,502 (4,761 Male and 3,741 Female) students have either dropped out or transferred to non-USE schools between 2007 and 2008 which translates into a rate of 5.3% (5.2% Male and 5.4% Female) and 25,578 (13,830 Male and 11,748 Female) students between 2008 and 2009 which translated into a rate of 8.1% (7.7% Male and 8.6% Female). This however transcended to 40,223 (21,465 Male and 18,758 Female) students between 2009 and 2010 representing a 13.8% (12.9% Male and 15.0% Female) 'dropout rate'. In 2011 due to several interventions, the number of students 'dropping out' of the USE/UPPET programme declined by 3% from 12.7% in 2010 to 9.6% in 2011. The year 2012 registered a 0.3 percentage increment from 9.6% in 2011 to 9.7% in 2012.

However, in 2013 the number of students 'dropping out' or transferring out of the programme of the USE/UPPET program increased by 3.2% from 9.7% in 2012 to 12.9% in 2013. The expected number of students was 925,991 students but the actual number of students after the headcount was 806,992 students for all the four classes under operation. This implies that 118,999 students either dropped out of schools or transferred to other non USE schools.

Drop Out/Transfer Out					
	Expected Students	Actual	Difference		%loss
Male	493,693	434,473	59,220	88.0%	12.0%
Female	432,298	372,519	59,779	86.2%	13.8%
Total	925,991	806,992	118,999	87.1%	12.9%

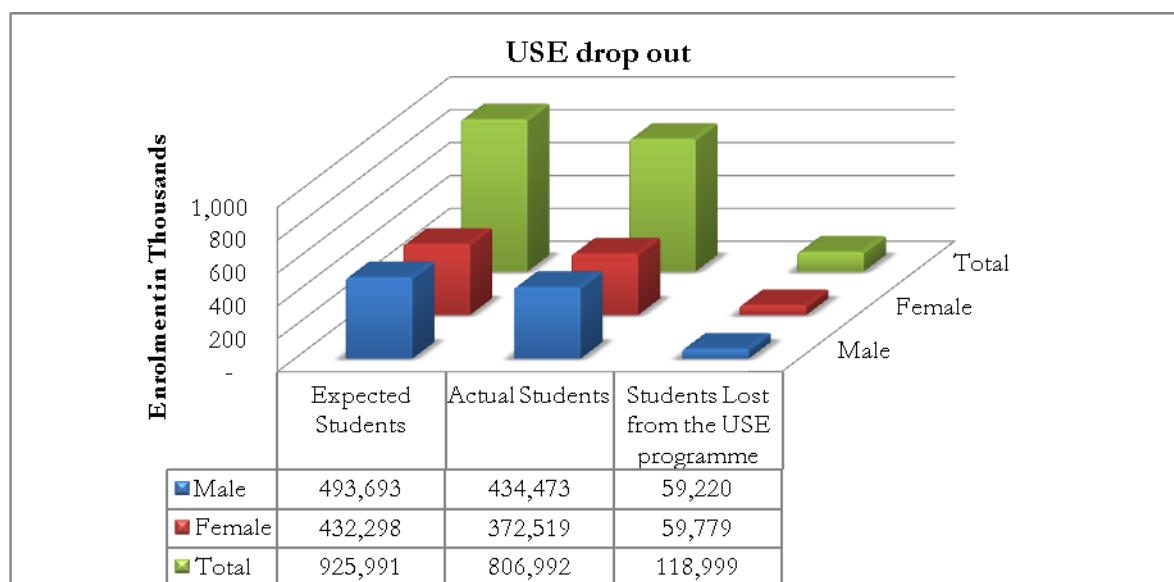

Figure 8 Showing the number of students dropping out of USE

Possible reasons for the loss of students are;

a) Primary reasons;

- i. Repetition: Some students are stopped or prevented from proceeding to the next class by their head teachers following anticipated poor performance especially in National examinations. It is also important to note that students who repeat cease to be eligible hence elimination from the program.
- ii. Foreigners; Some foreigners especially Sudanese who had encroached on the UPPET programme are being discouraged. This trend has been experienced mostly in the districts bordering with Sudan.
- iii. Early pregnancies; Pregnancy is also cited as the reason for the high drop out of the female students more especially in the Northern and North Eastern regions.
- iv. Discontinuing schools; some schools that were previously part of the USE/UPPET programme have opted out and some have been reported closed. These schools leave the School system and USE/UPPET programme with their students and this affects the USE/UPPET cohort. (See table 3.3 for some of the examples).

Table 7 USE/UPPET schools that have opted out or been closed

S/N	District	School	Ownership	Previous Enrolment
1.	Jinja	Mother Kevin	Government Aided	500
2.	Maracha	Quiver Self-Help Ss	Partnership	431
3.	Moyo	Fr Serri Memorial College Obongi	Partnership	236
4.	Tororo	Tororo Community SS	Partnership	101
5.	Lira	Racelle Comprehensive S.S	Partnership	301
6.	Wakiso	Wampewo Ntake SS	Government Aided	1,002
7.	Luweero	Bombo SS	Government Aided	905
8.	Bududa	Gate Of Hope S.S	Government Aided	207
9.	Nebbi	Pakwach Progressive	Partnership	103

b) Secondary reasons;

- i. Inadequate infrastructure such as but not limited to classrooms, laboratories and libraries in some schools has made parents to opt for non USE schools with better infrastructure.
- ii. Inadequate/lack of science equipments and facilities in some schools which makes students/parents to opt for schools with practical learning.
- iii. Lack of enough teachers in some USE schools to enable effective teaching and learning especially in the rural areas.

3.2.1 Senior one

- i. A total of 267,431 students (140,691 male and 126,740 female) were enrolled in S1 as of 10th April 2013. This indicates that the number of girl student enrolling in USE schools has dropped by 20% from last year 2012.

Girl Student Enrolment		
Year	Enrol't	%
2010	101,469	28.9%
2011	117,505	15.8%
2012	158,381	34.8%
2013	126,740	-20.0%

- ii. A total 251,040 students (132,596 male and 118,444 female) students were eligible for the USE/UPPET programme in senior one i.e. they scored aggregate 4-28. Of these, a total of 143,330 (73,040 male and 63,122 female) were found to be in government aided schools which represents 58% of the total number that subscribed for USE in 2013. 107,710 (55,332 male and 52,378 female) students were found to be in private schools representing 42% of the total eligible senior ones.

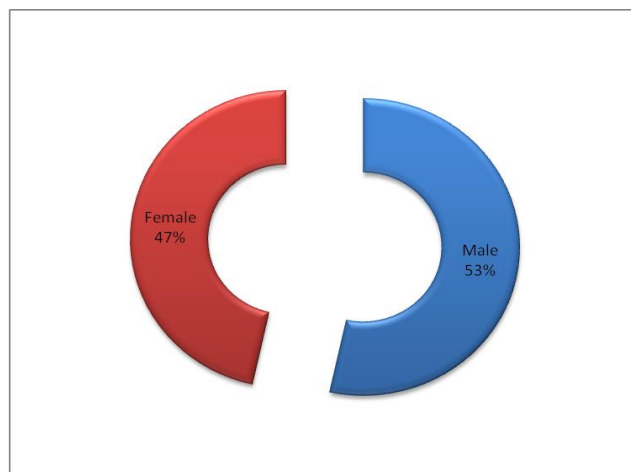

Figure 9 Showing USE S.1 Gender parity

- iii. Out of the eligible senior ones stated in (ii) above, 223,442 (119,208 male and 104,234 female) were physically counted in the exercise representing 95% of the total eligible senior ones and 12,486 (6,823 male and 5,663 females) representing 5% of the total eligible senior ones, were proven absentees.

- iv. The 31 (23 government aided and 8 public private partnership) schools were incorporated in the USE program in 2013. These schools registered a total of 1,902 eligible S1 students.

Enrolment and Number of new schools		
Government Aided	Schools	23
	Enrolment	408
Public Private Partnership	Schools	8
	Enrolment	1,494
Overall	Schools	31
	Enrolment	1,902

This means that accessibility to USE has increased at an average rate of 8.6% per year over the last four years. However those in S2, S3 and S4 have been left out of the eligible senior two, senior three and senior four since they are not part of the USE retention profile for 2010 to 2013.

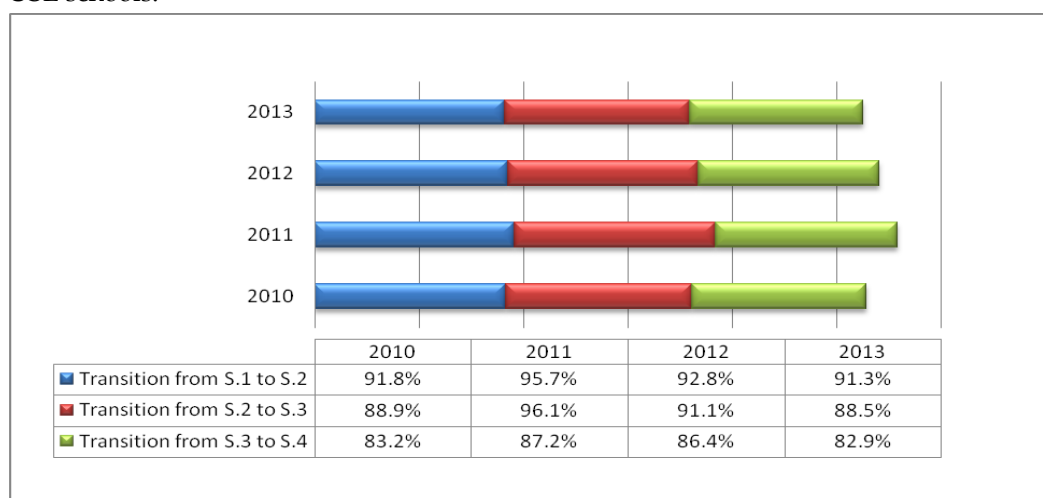

3.2.2 Senior two

- i. The total enrolment in senior two was recorded at 232,217 with 123,086 males and 109,149 females.
- ii. Of the above enrolment, total eligible students in senior two were 215,350 with 115,042 males and 100,308 females compared to 219,454 (118,143 males and 101,311 female) senior ones in 2012.
This translates into a promotion rate of 91.3% (a 1.5% decline from 2012) for USE students transiting from senior one to senior two. The remaining 8% of the S1 students that did not transit to S2 are presumed to have either dropped out or joined other non USE schools.
- iii. Of the 215,350 eligible students in senior two, 60% (121,702 with 66,539 male and 55,163 female) were found to be in government aided schools while 40% (93,648 with 48,503 male and 45,145 female) in private schools.
- iv. Out of the eligible senior twos, 197,486 students (104,798 male and 92,688 female) were physically counted in the exercise representing 93% of the total eligible senior twos.
- v. Proven absentees for senior twos totaled to 18,176 (10,392 male and 7,784 females) representing only 7% of the total eligible senior twos.

3.2.3 Senior three

- i. The total enrolment in senior three was recorded at 213,744 with 115,785 males and 97,959 females representing 21% of the overall USE schools' enrolment of 891,519.
- ii. The total eligible students in senior three were 194,188 with 105,432 males and 88,756 females compared to 219,454 (118,143 males and 101,311 females) senior twos in 2012.

This translates into a promotion rate of 88.5% meaning a drop in performance from last year's 91.1%. The remaining 11.5% appear to have either dropped out or joined other non USE schools.

- iii. Of the 194,188 eligible students in senior three 63% of the eligible senior three students were found in government aided schools whilst 37% in private schools.

- iv. Out of the eligible senior threes, 194,188 students (95,967 male and 82,144 female) were physically counted during the exercise; representing 95% of the total eligible senior threes.
- v. Proven absentees for senior three were 17,885 (10,449 male and 7,436 females) representing 9% of the total eligible senior threes. These cases of absenteeism were mainly due to schools winding up the term before the exercise.

3.1.4 Senior four

- i. Total enrolment for senior four stands at 178,127 with 97,961 males and 80,166 females.
- ii. The total eligible students in senior four were 146,414 with 81,403 males and 65,011 females compared to 176,553 (96,208 males and 80,345 female) senior threes in 2012. This translates into a promotion rate of 82.9% for USE students a 3.5 percentage decline in performance from 2012. However, the implication is that the number of senior four eligible students dropped by 28% (24% in 2012).

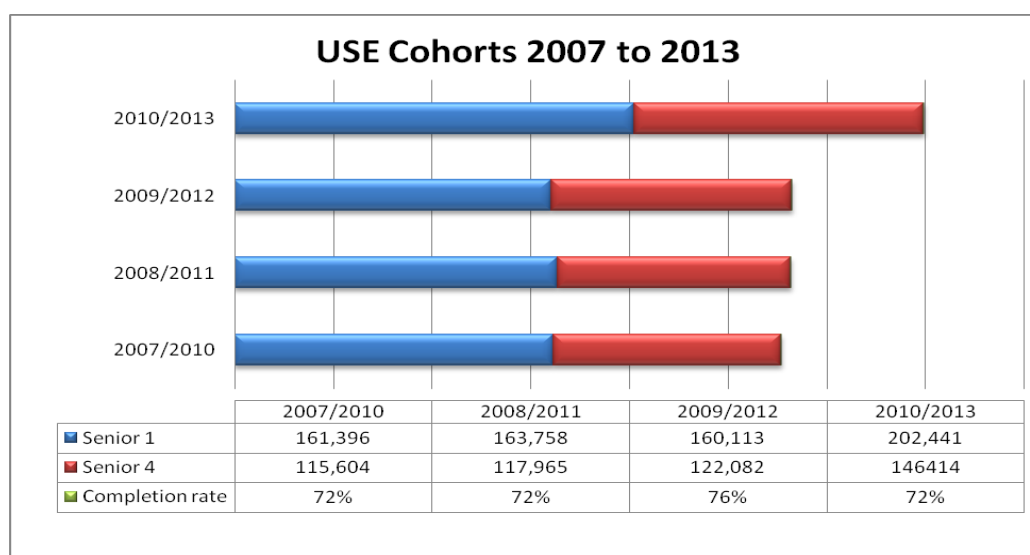

Figure 10 USE completion rate (2007 to 2013)

- iii. Of the 146,414 eligible students in senior four 63% (92,701 with 51,932 male and 40,769 female) of the eligible senior four students are in government aided schools while 37% were in private schools. This huge percentage in government secondary schools is tailored to the availability of infrastructure such as laboratories and libraries which are well sought for by senior four students in order to pass their UCE exams.
- iv. Out of the eligible senior fours, 146,414 students (76,843 male and 61,910 female) were physically counted in the exercise representing 95% of the total eligible senior fours.
- v. Proven absentees for senior four totaled to 11,081 (6,367 male and 4,724 females) representing an insignificant 8% of the total eligible senior fours.

3.2.5 USE Area disparities

Significantly, USE subscription still remains predominantly a rural phenomenon. Headcount findings show that 90% of the schools participating in the USE/UPPET programme are rural based. This is further evidenced in the enrolment with 598,451 USE eligible students found to be in the rural areas. This represents 87% of the total eligible students and 82% of the whole USE schools population.

During the period 2007 and 2013, rural accessibility to secondary education has risen by almost 7 percentage points while no significant changes were observed in urban areas.

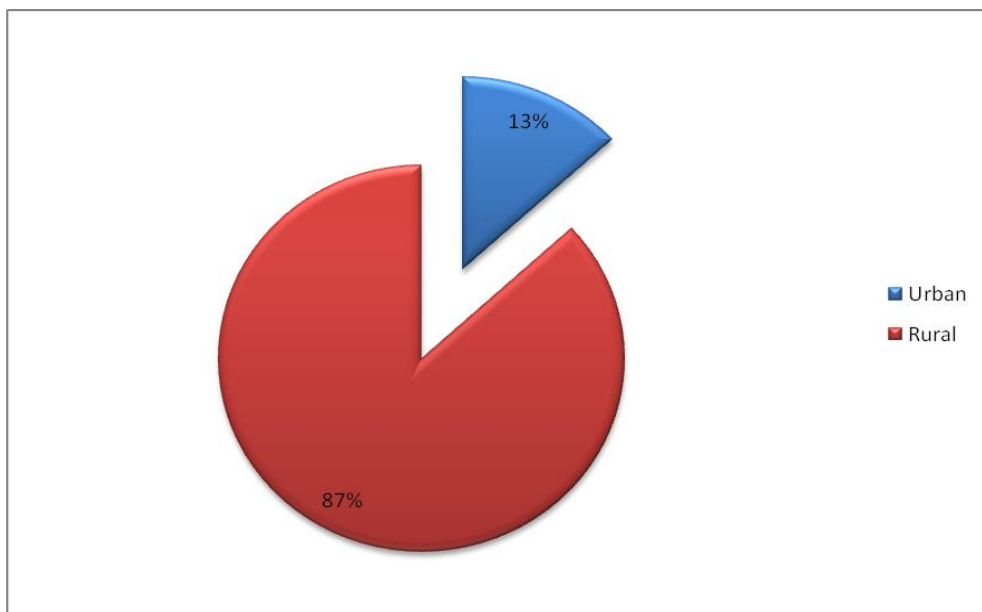

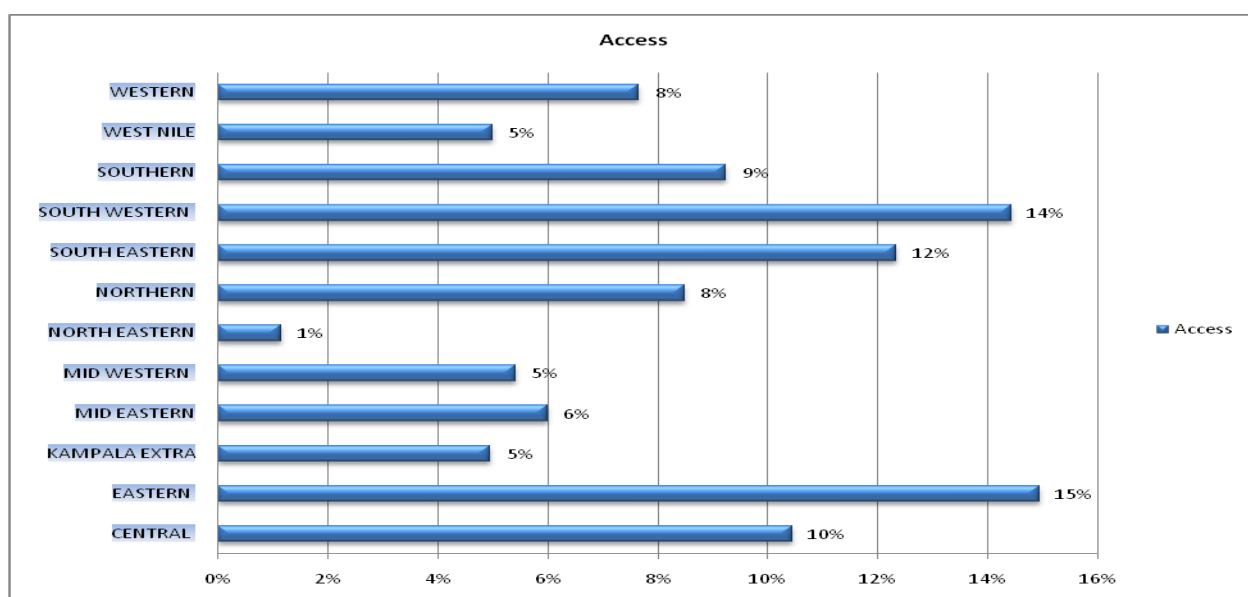

Figure 11 Area disparities by enrolment

Regional imbalance, especially between the North Eastern region and the rest of the country has persisted for years. The North Eastern region has maintained the highest incidence of inaccessibility to USE with a proportion of less than 2% of the whole USE population. This is largely attributable to its terrain, attitude towards education, nomadic nature of the people living there coupled with the cattle rustling problem that has traditionally plagued the Karamoja and surrounding sub-regions.

Figure 3.5: USE Access by Regional

Although the North Eastern region still has the highest USE inaccessibility incidence, results show a gradual increase in its secondary school enrolment since 2007. This may partly be attributed to the interventions of both the humanitarian and government interventions in the region and the cessation of hostilities culminating in the relative calm.

3.2.6 Classrooms

The table 8 below shows that on average, more than 100 students occupy a classroom which is way above the stipulated 60 students per class according to the USE policy. Of the 13,533 classrooms reported, 58% were in government and 42% in private schools. There is a national average of 62 students per class with government and private schools averaging 66 and 56 students per class respectively. This reveals a need for more classrooms in government schools to match the policy requirements.

Congestion in UPPET schools is high with almost 34% of the schools accommodating over 60 students in a class. The policy is 60 students per class. The Ministry has setup programmes in place, like the World Bank (APL1) and ADB to address this problem in the medium term.

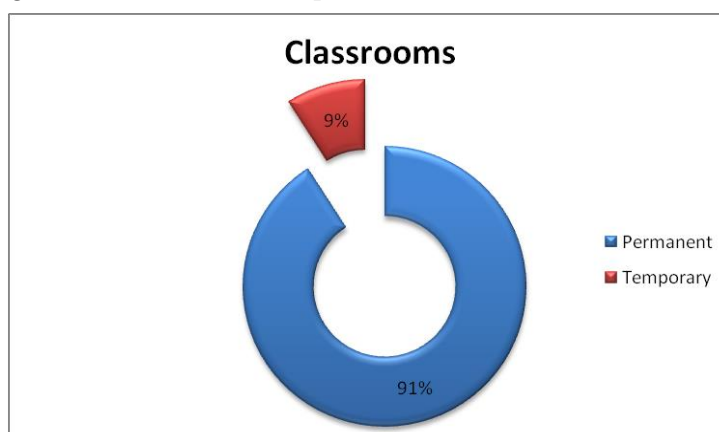

Figure 12 Showing nature classrooms

61	Buyende	Kidera Ss	USE/UPOLET	Government Aided	1,103	11	100

It was also observed from the headcount exercise that schools are not building the same size (i.e. no standard size) of classes and laboratories to accommodate the 60 students per class as stipulated by the policy.

3.2.7 Libraries

Headcount results show that of the 1,819 schools that benefit in the USE/UPPET programme only 1,029 (449 government and 580 private) schools have library facilities meaning a total of 790 (43%) schools lack libraries. This implies a ratio of 1:2 and reflects an urgent situation if performance in USE schools is to be improved.

3.2.8 Laboratories

Results indicate that there are 2,372 laboratories for the 974,605 students enrolled in the 1,819 USE benefiting secondary schools. This represents a ratio of 410:1 (students per laboratory) which reveals a colossal gap if the government's aim to foster science education is to be achieved.

3.2.9 Latrines

Findings from the also reveal that there are 6,378 latrines available to the 974,605 students enrolled and 39,244 in the USE schools. This result translates into an average of 141 students per latrine. It is also important to note that of the 5,364 latrines found, 918 are in a temporary state. This means that 13% of the latrines are in a temporary state which if tailored to a Student Latrine ratio of 141:1, poses a massive challenge that should be dealt with expeditiously in order to alleviate the evident poor sanitary conditions in the USE schools.

Table 9 USE facilities

Ownership	No. of Schools	Male Enrol't	Female Enrol't	Total Enrolment	Class rooms	Labs	Latrine	Library

3.2.10 Teachers

According to the data availed from head count exercise, there are 39,244 (24894 government schools and 14,350 private schools) teachers for the 974,605 students in the 1,819 USE schools; females teachers constituting a meager 23%. This relates to a 25:1 student teacher ratio. In terms of subject distribution, there are only 11,890 (7,909 in government schools and 3,981 in private partnership schools) science teachers which is represented by a substantive 35% (36% government) for the students population.

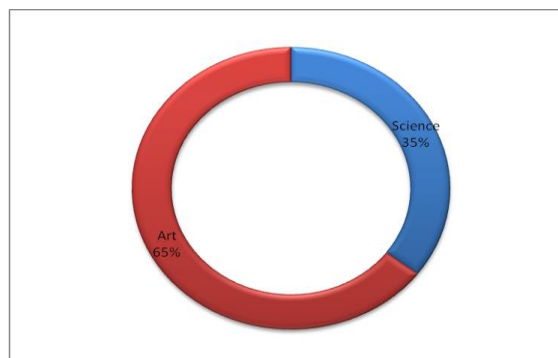

Figure 13 showing secondary school teachers by subject

Of the 33,645 teachers reported, 21,933 (16,751 male and 5,182 female) are found in government schools. It's important to note that of the reported teachers, only 15,409 were on the government payroll reflecting a 46% proportion of the total teachers.

Results further indicate that the overall contact between students and teachers in a classroom is 25:1 (students per teacher). This is a positive indicator for the programme considering that the ideal ratio is 40 students per teacher but it is just an average which is not a true representation of the state of each school.

Table 10 Showing summary results on teachers

3.2.12 USE Schools where head count didn't take place

Headcount was not done in the following schools/Institutions. These schools were part of the USE head count schedule but head count didn't take place because of various reasons as presented in table 3.6 below.

Table 11 Showing secondary schools that were not headcounted

S/N	District	School	Findings
1.	Amudat	Pokot Girls Boarding Seed Ss	Newly coded school. The school is currently not operational.
2.	Apac	Abongomola Seed Ss	Newly coded school. The school does not exist and therefore it's currently not operational.
3.	Bulambuli	Bukhalu Seed Ss	Newly coded school. The school is currently not operational.
4.	Kitgum	Agoro Seed Ss	Newly coded school. The school is currently not operational.
5.	Agago	Patongo Seed S.S	Newly coded school. The school is currently not operational.
6.	Agago	Lapono Seed Ss	Newly coded school. The school is still under construction and therefore currently not operational.
7.	Amuria	Obalanga Seed Ss	Newly coded school. The school is currently not operational.
8.	Apac	Maruzi Seed Ss	Newly coded school. The school is currently not operational.
9.	Nebbi	Pakwach Progressive	The school was closed is currently not operational because lack of infrastructure and teachers.
10.	Rubirizi	Katunguru Seed Ss	Newly coded school. The school is currently not operational.
11.	Yumbe	Apo Seed Ss	Newly coded school. The school is currently not operational.
12.	Nebbi	Pakwach Progressive	
13.	Wakiso	Golden Christian College	
14.	Wakiso	Gayaza Cou Ss	
15.	Bududa	Gate Of Hope S.S	
16.	Iganga	Bugweri College	

Note: For detailed information of all participating schools please refer to Annex 9 List of USE participating schools showing Enrolment, STR and SCR 2013.

3.2.13 USE schools that have over-subscribed

As a policy each participating secondary school is expected to have two streams of 60 students each. However results show that some government and private schools have more than 120 students in a class. A summary of the schools is shown in Table 12 below: For more details (see Annex 9).

Recommendation:

- Some of these school have been integrated into the double shift programme but more needs to be done on there expansion.
- There is need to introduce/attract more players (especially using the Public Private Partnership window) in the catchment area of these schools so as to offload the congestion burden from these schools.

3.2.14 USE schools that have under-subscribed

There are school schools that have enrolments below 50 students, as listed in Table 13 below:

Table 13 showing schools that under sub-subscribed 2013

Recommendation:

It is recommended that some of these schools should be dropped from the USE programme because they have failed to attract students and be replaced with schools in areas that most need the programme.

3.2.15 Substantial loss (drop) and gain in enrolment

There were schools that showed outrageous gain or loss of students during the transition 2012 to 2013 (S1 to S2, S2 to S3 and S3 to S4) as shown in tables 14 and 15 respectively. This implies that students are abnormally accessing the programme but also indicates the 'dropping out' of the programme is very eminent. There is need to carry out more investigation in order to ascertain the basis for these abnormal occurrences.

Table 14 Showing schools that lost more than 200 students in transition 2012 to 2013

Recommendation:

It is recommended that a further study be done to ascertain the reasons and causes of the drop in students transiting to the next class.

3.3 Universal Post O'Level Education and training (UPOLET)

Universal Secondary A'Level Education

- i. Eligible students i.e. passed between DIV 1-3 at (UCE) under UPOLET schools (S.5-S.6) totaled 67,951 of who 46,066 were male and 21,885 female resulting in 77% (75% male and 80% female) increment from last year. The significant increment is due to the introduction of a new class S6 making it two classes (S5 and S6). The results indicate that the Government Aided schools have 47,128 students while the PPP schools have 20,823 students eligible for USE.
- ii. The UPOLET program was commenced with a total of 38,474 (26,291 male and 12,183 female) students in 2012. However, in 2013 the senior five has slightly declined with an intake of 33,350 (22,426 male and 10,924 female).

- iii. Out of the UPOLET eligible students stated in (i) above, 22,484 (17,374 male and 5,110 female) study Sciences representing a meager 33% of the total eligible senior fives and 45,510 (28,725 male and 16,785 females) representing 67% of the total eligible senior fives, were Arts students.

Figure 14 Showing UPOLET share by subject

- iv. The 959 (699 government aided and 260 public private partnership) schools are incorporated in the UPOLET program.

Class	Subject/ Gender	GOVERNMENT AIDED	PARTNERSHIP	Grand Total
No. Of UPOLET Schools		699	260	959
Senior Five	Science M	6,586	2,233	8,819
	Science F	1,779	952	2,731

	Total F	5,159	1,341	6,500
	Total T	21,087	5,745	26,832

These 959 schools registered a total of 67,951 UPOLET eligible students. This means that with the commencement of UPOLET programme, accessibility to Universal Secondary Education has increased by 8% in 2013.

3.4 USE_UPOLET Headcount 2013 financial implication

- i. A total of UGX 35,098,268,000 /= per term is required for the 806,992 (471,726 government and 335,266 private) eligible students at a rate of UGX 41,000/= (Government schools) and UGX 47,000/= (Private schools). It should be noted that for FY 2013/14 the estimated budget required is UGX 105.4bn to be under USE for both public and private participating schools against a budgetary provision of UGX 97.5bn resulting in an estimated shortfall of UGX 5.9bn in the next FY 2014/15 budget.

Table 16 Showing funds required to pay USE capitation per term 2013

Ownership	No. Of Schools	Eligible Students	Funds Required Per Term	Funds Required FY 2013/14
Government Aided	944	471,726	19,631,208,000	58,893,624,000
Partnership	875	335,266	15,528,728,000	46,586,184,000
Grand Total	1,819	806,992	35,159,936,000	105,479,808,000

- ii. A total of UGX 5,558,785,000 /= per term is required for the 67,951 (47,128 government and 20,823 private) eligible students at a rate of UGX 80,000/= (Government schools) and UGX 85,000/= (Private schools). It should be noted that for FY 2013/14 the estimated budget required is UGX 16.6bn to be under UPOLET (Secondary schools).

Table 17 Showing funds required to pay UPOLET capitation per term 2013

Ownership	No. of Schools	Eligible Students	Funds required per term	Funds required FY 2013/14
Government Aided	699	47,128	3,798,280,000	11,394,840,000
Partnership	260	20,823	1,760,505,000	5,281,515,000
Grand Total	959	67,951	5,558,785,000	16,676,355,000

- iii. Overall, total minimum of UGX 40,718,721,000 /= per term is required for the 874,943 (518,854 government and 356,089 private) eligible students in both USE and UPOLET programmes. It should be noted that for FY 2013/14 the overall estimated budget required is UGX 122.2bn for both programmes against a budgetary provision of UGX 97.5bn resulting in an estimated shortfall of UGX 5.9bn in the next FY 2014/15 budget.

Table 18 Showing overall funds required to pay USE and UPOLET capitation per term 2013

Ownership	No. of Schools	Eligible Students	Funds required per term	Funds required FY 2013/14
Government Aided	944	518,854	23,429,488,000	70,288,464,000
Partnership	875	356,089	17,289,233,000	51,867,699,000
Grand Total	1,819	874,943	40,718,721,000	122,156,163,000

3.9 BTVET UPPET_UPOLET National Headcount 2013 findings

- i. P.7 enrolling BTVET Institutions had a total count of 8,206 (6,462 Male and 1,744 Female) eligible students representing a 3% increment from last year's 7,932 eligible students.
- ii. P.7 enrolling BTVET Institution intake in year one has been increasing since inception of the UPPET program in 2007. The program was kick started in 2007 with a total of 3,024 (2,365 male and 659 female) students in year one. In 2008, the intake in year one increased to 3,322 (2,628 male and 694 female) a tune of 10% increment. 2009 and 2010 registered a relatively stable intake with a 1% and 4% increment respectively. In 2011, the year one intake increased to by 3,756 (3,054 male and 702 female) a tune of 7.1% but with girls decreasing by 8.4%. The year 2012 witnessed a decline in the year one intake 2,837 (2,270 male and 567 female) representing a 32% decline. However this year 2013, the Year One intake has increased by 3%. The trends of year one intake are presented in the Figure 15 below;

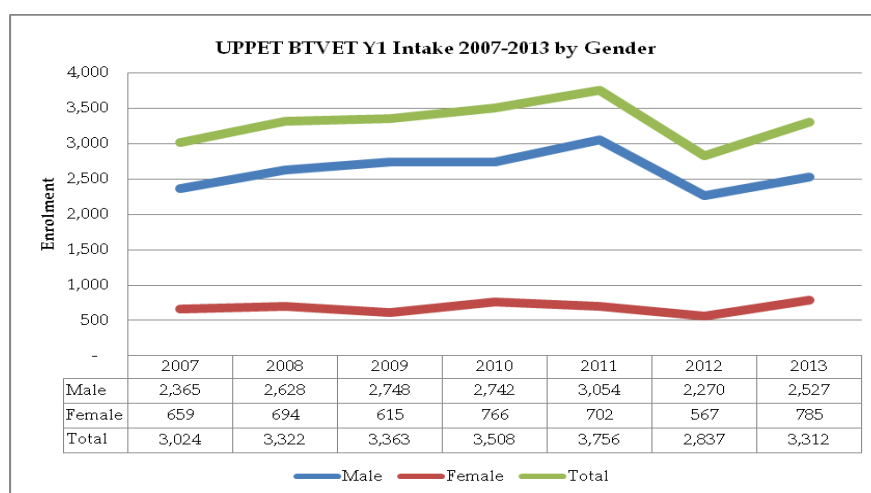

Figure 15 Showing Year One intake in P.7 Enrolling BTVET Institutions 2007-2013

- iii. The 2013 headcount results reflect a transition rate of 91.3% (91.6% male and 84.3% female) from Y.1 to Y.2 and 84.6% (84.3% male and 86.0% female) from Y.2 to Y.3. Overall, for the last two years over 61% have managed to make it to year three.

The remaining students have repeated a year, transferred to non-UPPET institutions or dropped out.

The 2013 headcount results reflect the following in regard to transition rates; Transition from Y.1 to Y.2 increased by 18.8% (19.5% male and (15.9)% female) while that for Y.2 to Y.3 showed a 7.4% increment (7.3% male and 7.9% female);

This increment in transition is mainly attributed to more awareness by the public and sector players of the contribution of the programme in regard to economic development and the introduction of the Skilling Uganda initiative that empowers TVET education for economic prosperity.

Table 19 National Headcount 2013 BTVET cohort summary

			2006	2007	2008	2009	2010	2011	2012	2013

	Female				91.7%	92.7%	93.0%	80.5%	74.2%	90.1%
	Total				96.8%	95.9%	88.4%	87.6%	72.5%	91.3%
Transition from Y.2 to Y.3	Male					87.8%	80.3%	86.1%	77.0%	84.3%
	Female					77.2%	76.2%	78.7%	78.1%	86.0%
	Total					85.6%	79.5%	84.7%	77.2%	84.6%

Results from Table 19 indicate that;

- The absolute number of eligible students enrolling in year one increased from 3,024 (2,365 Male and 659 Female) in 2007 to 3,322 (2,628 Male and 694 Female) in 2008 and 3,363 (2,748 Male and 615 Female) in 2009 before reaching 3,508 (2,742 male and 766 female) in 2010. The year 2011 witnessed a further 7% increase with an enrolment of 3,756 (3,054 male and 702 female). In 2012, the programme witnessed a 24% decrease in subscription of year ones with 2,837 (2,270 males and 567 females) from 3,756 students in 2011 in year one. The year 2013 registered a 17% increase in the year one enrolment with 3,312 (2,527 male and 785 female).
- These results reveal an average increment of 2.5% per year with a 4.9% average increment for girl students accessing education through the USE/UPPET program per year since 2007.
- Transition from year one to two gradually increased from 72.5% in 2012 to 91.3% in 2013.
- Transition from year two to year three was 84.6% with girls registering a higher transition of 86.0% compared to 84.3% for boys.
- 96 (41 Male and 55 Female) students dropped out of the programme between 2007 and 2008 which translates to a rate of 3.2% (1.7% Male and 8.3% Female). This however transcended to 1,044 (848 Male and 196 Female) translating into a 15.9% loss in 2010. The year 2011 witnesses an improvement in retention with the system losing 892 student along the way translating to a 13.8% loss.

- vi. Since 2011, 1,699 students have either dropped out or transferred to non UPPET schools/institutions. This translates into a loss of 12.1% from the expected 10,627 eligible students to 9,344 students under BTJET currently for all the three classes under operation.

Drop Out/Transfer Out					
	Expected Students	Actual	Difference	%loss	
Male	7,851	6,462	1,389	82.3%	17.7%
Female	2,054	1,744	310	84.9%	15.1%
Total	9,905	8,206	1,699	82.8%	17.2%

Possible reasons for the loss of students are;

c) **Primary reasons;**

- Repetition: Some students are stopped or prevented from proceeding to the next class by their head teachers following anticipated poor performance especially in National examinations. It is also important to note that students who repeat cease to be eligible hence elimination from the program.
- Early pregnancies; Pregnancy is also cited as the reason for the high drop out of the female students more especially in the Northern and North Eastern regions.

3.9.1 Year one eligible students

Results from the Head Count exercise further indicate that;

- A total of 4,243 students (3,178 male and 1,065 female) were enrolled in Y1 by 10th April 2013 of these, a total of 3,312 (2,527 male and 785 female) students were eligible for the programme in year one i.e. they scored aggregate 4-28.
- Of the 4,243 eligible year one students, a total of 3,274 (2,671 male and 603 female) were found to be in Government institutions which represents 88% of the total eligible year ones while 482 (383 male and 99 female) were found to be in 15 private institutions representing 12% of the total eligible year ones.
- Out of the 3,312 eligible year ones 3,046 (2,341 male and 705 female) were physically counted in the exercise representing 92% of the total eligible year ones.
- Proven absentees for year ones totaled to 266 (186 male and 80 females) representing 8% of the total eligible year ones.

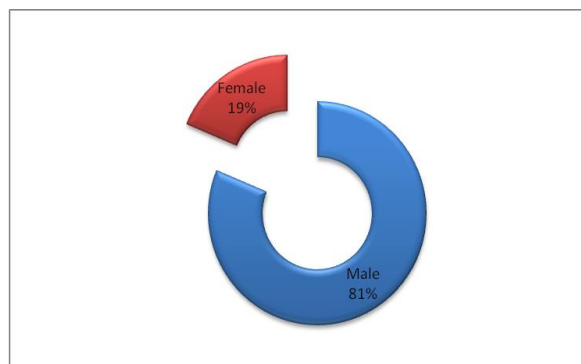

Figure 16 Showing BTJET Y.1 Gender parity

3.9.2 Year two eligible students

- i. The total enrolment in year two was recorded at 3,320 with 2,534 male and 786 female.
- ii. The total eligible students in year two were 2,590 (2,079 males and 511 females) compared to 2,723 (2,202 males and 521 females) year ones in 2012. This translates into a promotion rate of 87.6% for UPPET Eligible students. The remaining 12.4% seem to have dropped out or transferred to other institutions.
- iii. Of the 3,072 eligible students in year two, 2,721 (2,177 male and 544 female) were found in Government institutions and 351 (278 male and 73 female) in private institution.
- iv. Out of the eligible year twos 2,268 students (1,836 male and 432 female) were physically counted in the exercise representing 90% of the total eligible year twos.
- v. Proven absentees for year twos totaled to 322 (243 male and 79 females) representing 9% of the total eligible year twos.
- vi. Results indicate that this year recorded a decrease of 436 students from last year representing a 12.4% decline.

3.9.3 Year three eligible students

- i. A record of 3,017 with 2,312 male and 705 female students was reported as total enrolment for year three.
- ii. The total eligible students in year three were 2,304 (1,856 males and 448 females) compared to 2,372 (1,890 males and 482 females) year two students in 2012. This translates into a promotion rate of 84.7% for UPPET Eligible students. The remaining 25.3% seem to have dropped out or transferred to other institutions.
- iii. Of the 2,516 eligible students in year three, 2,216 (1,833 male and 383 female) were found in Government institutions and 300 (233 male and 67 female) in private institution.
- iv. Out of the eligible year threes 2,304 students (1,634 male and 382 female) were physically counted in the exercise representing 92% of the total eligible year threes.
- vi. Proven absentees for year threes totaled to 288 (222 male and 66 females) representing 8% of the total eligible year threes.
- vii. Results indicate that this year recorded a slight decrease of 456 students a 30% increase from 653 (55%) students recorded last year. Below are the possible reasons why there is a decline in Y.3 students;
 - a) Student have either dropped out or joined other non USE schools.
 - b) Repetition: Some students are denied to proceed to year three by their headteachers following anticipated poor performance in National examinations. It is also important to note that students who repeat cease to be eligible hence elimination from the program.
 - c) Inadequate infrastructure such as but not limited to classrooms, laboratories and libraries in some schools has made parents to opt for non UPPET institutions with better infrastructure.

3.10 UPOLET BTJET Technical and Health Institutions Analysis

Table 20 National Headcount 2013 BTJET UPOLET cohort summary

			2012	2013
BTJET UPOLET Eligible students	Year 1	Male	1,701	2,856
		Female	453	449
		Total	2,154	3,285
	Year 2	Male		2,434
		Female		413
		Total		2,847
	Total	Male	1,701	5,290
		Female	453	862
		Total	2,154	6,132
HEALTH UPOLET Eligible students	Year 1	Male	445	540
		Female	593	483
		Total	1,038	1,023
	Year 2	Male		588
		Female		709
		Total	-	1,297
	Total	Male	445	1,128
		Female	593	1,192
		Total	1,038	2,320

Results from Table 20 indicate that;

i. BTJET UPOLET Eligible students

Eligible students i.e. O'level enrolling into Technical Institutions totaled to 6,132 of who 5,290 were male and 862 female resulting into an increment in enrolment three times higher than that of last year. The significant increment is due to the introduction of a new class year two making it two classes (Y1 and Y2). All these students are from the 53 government aided BTJET technical institutions.

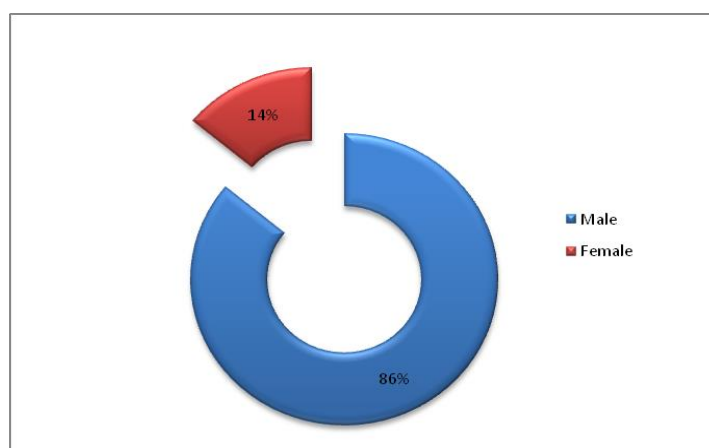

Figure 17 UPOLET BTJET share of enrolment by gender 2013

The UPOLET program was commenced with a total of 2,154 (1,701 male and 453 female) students in 2012. However, in 2013 the Y2 has attracted more students with an intake of 2,847 (2,434 male and 413 female).

The absolute number of eligible students enrolling in year one increased from 2,154 (1,701 Male and 453 Female) in 2012 to 3,285 (2,856 Male and 449 Female) in 2013. This means that the year 2013 has witnessed a 53% increase from 2012.

ii. HEALTH UPOLET Eligible students

Eligible students i.e. O'level enrolling to Health institutions totaled to 2,320 of who 1,128 were male and 1,192 female resulting into an increment in enrolment two times higher than that of last year 2012. The significant increment is due to the introduction of a new i.e. class year two into the programme and thus making it two classes (Y1 and Y2). All these students are from the 8 government aided BTNET health institutions.

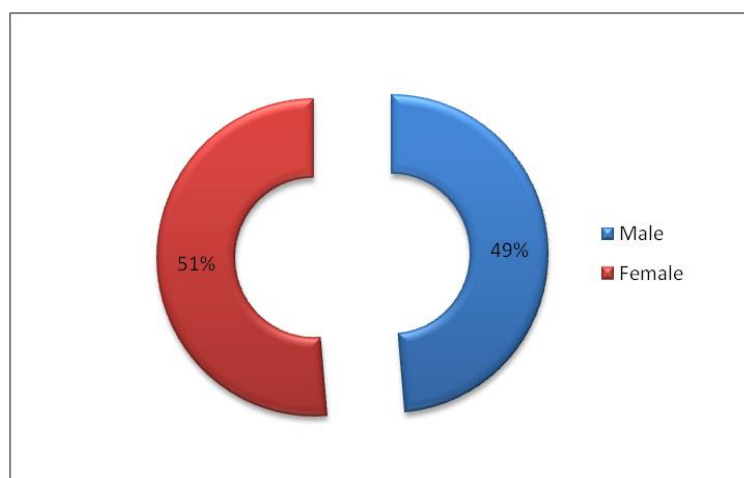

Figure 18 showing UPOLET Health share of enrolment by gender 2013

The UPOLET/Health program was commenced with a total of 1,038 (445 male and 593 female) students in 2012. However, in 2013 the Y2 has attracted more students with an intake of 1,297 (588 male and 709 female).

The absolute number of eligible students enrolling in year one decreased from 1,038 (445 Male and 445 Female) in 2012 to 1,023 (540 Male and 483 Female) in 2013. This means that the year 2013 has witnessed a 1% decline from 2012.

3.11 BTNET/UPPET_UPOLET Headcount 2013 financial implication

- A total of UGX 1,641,200,000/= per term is required for the 8,206 (6,775 government and 1,431 private) eligible students at a flat rate of UGX 200,000/= (Government schools and Private schools). It should be noted that for FY 2013/14 the estimated budget required is UGX 5.5bn to be under UPPET for both public and private participating schools against a budgetary provision of UGX 5bn resulting in an estimated shortfall of UGX 0.5bn in the next FY 2013/14 budget.

Table 21 Showing funds required to pay capitation for eligible P.7 enrolling BTNET students per term 2013

Category	Unit (UGX)	Enrolment	Amount (UGX)
Government	200,000	6,775	1,355,000,000
Private	200,000	1,431	286,200,000
Total		8,206	1,641,200,000

- ii. A total of UGX 2,538,648,000/= per term is required for the 6,132 eligible students at a flat rate of UGX 414,000/=. It should be noted that for FY 2013/14 the estimated budget required is UGX 7.6bn for the UPOLET Technical Institutions against a budgetary provision of UGX 5bn resulting in an estimated shortfall of UGX 2.6bn in the next FY 2013/14 budget.

Table 22 Showing funds required to pay capitation for eligible S.4 enrolling BTVET students in technical institutes per term 2013

BTVET/UPOLET Funds Required per term

Category	Unit (UGX)	Enrolment	Amount (UGX)
Government	414,000	6,132	2,538,648,000

- iii. A total of UGX 960,480,000/= per term is required for the 2,320 eligible students at a flat rate of UGX 414,000/=. It should be noted that for FY 2013/14 the estimated budget required is UGX 2.9bn for the UPOLET Technical Institutions against a budgetary provision of UGX 2bn resulting in an estimated shortfall of UGX 0.9bn in the next FY 2013/14 budget.

Table 23 Showing funds required to pay capitation for eligible S.4 enrolling BTVET students in health institutions per term 2013

BTVET/UPOLET Funds Required per term

Category	Unit (UGX)	Enrolment	Amount (UGX)
Government	414,000	2,320	960,480,000

- iv. Overall the BTVET sector total requirement is UGX 15.4bn for FY 2013/14 with the technical institutions taking the lions share with a total need of UGX 7.6bn. as show in the table

Category	Total need FY 2013/14
UPPET Technical Schools	4,923,600,000
UPOLET Technical Institutions	7,615,944,000
UPOLET Health Institutions	2,881,440,000
Total	15,420,984,000

3.3 *Headcount monitoring exercise*

For ease of implementation, monitoring and supervision, the country was divided into fifteen regions to which technical officers of Ministry of Education and Sports (MoES) and Office of the President were attached to provide the very much need technical backstopping and supervision of the entire exercise.

3.3.1 *Objectives*

The objectives of the monitoring exercise included the following:

To assess the whether the headcount guidelines and procedures where adhered to during the enumeration and to evaluate the statistical accuracy, validity, reliability, completeness and relevance of the headcount exercise.

The standing procedures and expectations from the headcount monitoring Team were;

- i. Ensure that the Headcount exercise is done according to set guidelines and procedures
- ii. Ensure that Headcount materials are received by the enumerators before the headcount day
- iii. Ensure that the GISOs submit the headcount forms to the DISOs by 27th March 2012.
- iv. Ensure that DISOs deliver all the headcount instruments to their respective RISOs by 29th March 2012.
- v. Ensure that RISOs deliver all the headcount instruments to the Ministry headquarters by 2nd April 2012.
- vi. Submit their respective monitoring field reports to the Ministry of Education and Sports by the 4th April 2012.

3.3.2 *Scope of Exercise*

The monitoring exercise targeted all UPPET and UPOLET implementing schools/institutions.

3.3.3 *Problem Statement*

Given the fact that USE capitation grants, are allocated basing on the headcount facts, there is a tendency by the various players to inflate the number of eligible students so as to attract more resources. These practices gravely endanger the reliability of data from the headcount exercise and policy formulation. It's also worth noting that although a lot of sensitization has been made towards the need to have all required documents (like the daily attendance registers and admission), many head teachers/principals have continued to falter in this regard making it hard to verify and investigate the eligibility of the students presented for headcount. It's against this that the Ministry of Education and sports constituted monitoring teams to check on the adherence of the headcount exercise guidelines and procedures.

3.3.4 Methodology

The methodology comprised interviews with education sector stakeholders that included RDCs, CAOs, DEOs and the community in the Local Governments. Observation of procedures during the headcount and a review of the records at the schools/ institutions visited were done with the aim of ascertaining clarity, accuracy, validity, reliability, completeness and relevance of the records to the enumeration.

For ease of implementation of the monitoring exercise, the country was divided into fifteen regions to which a team of technical officers of MoES and Office of the President were tagged to provide the very much need technical backstopping and supervision of the entire exercise. The monitoring teams also used emotional intelligence to further probe and dig into necessary information in order to arrive to factual conclusions.

3.3.5 Findings of the Headcount monitoring exercise

SCHOOL NAME	FINDINGS
St. Peters .S.S Busubizi	At noon, I was at ST.PETERS. The GISO had reached but the head teacher stopped them from doing the headcount that she was busy in the meeting with the Priests who are the founders. I had to intervene the meeting and told them that it was a national headcount. The head teacher then after delegated and the exercise went on.
Gomba Global College	We checked the registers, identity card and admissions. All were ok. But students present were very few compared to those who were absent. For stance in S1 according to the register, they had 40 students compared 11 who were present.
Iganga	The CAO complained that the DISOs do not involve them at all during the exercise yet if there are any discrepancies he is blamed. He further suggested that either him (CAO) or atleast the DEO should be involved during the exercise.
Abudala Anyuru Mem	Many students failed to present the required documentation.
Loro S.S	- There was some communication gap as school authorities claim to have been informed of the exercise late. - Many students at A level are recorded in the registers but were not physically present and the administration or their fellow students can't explain their absence. e.g out of 22 registered students at S.5, only 3 were counted.
Ayer Seed S.S	- The school authorities claimed to have not been informed of the exercise in time. - The school head teacher complained of high

SCHOOL NAME	FINDINGS
	absenteeism and dropout which alter the figures S1 & S5 student have not yet been issued with school IDs.
Lira S.S	- Class registers are never updated as some students were not appearing in the registers. - Many students especially those on transfer cases don't have their original documentations.
Light Voc S.S	Students' mobilization was lacking as some were missing the required documentation and others had been sent home for school fees.
Bright Light College	- Some students were lacking documentation. - High enrolment figures. - The performance has dropped because of the laxity in screening of the students at entrance (allowed those with aged 28) in reference to the government guidelines.
Saviors S.S	- Communication gap as the school authorities were not aware of the exercise until this Day. - Neither the head teacher nor the deputy was around for the exercise. The DISO was assisted by the Deputy Director and some class teachers. - Some students' documents could not be traced during the exercise. - Some claimed absentees could not be proved.
Lira Town College	Some students could not present clear documentation required claiming that they were not informed in time about the exercise.
Agwata S.S	The school identity cards had not yet been processed. The head teacher claimed that the contracted company delayed to deliver on time.
Luzira SS	Enumerator requested for transport from the school administration.

2.2 Cross Cutting Issues

- Most Local government education official decried the non involvement in this year's exercise.
- Most of the students who had no Identity Cards were not counted.
- Most Headteachers requested for an increment in the capitation to reflect the current economic situation.
- Most headteachers complained about the delay of capitation.
- Headteachers requested for incentives such as text books and lab equipment to increases on the moral and motivation in school.
- The headteachers requested for training before the exercise because some GISO leave out some students and some head teachers do not know the reasons for this.

- vii. Exercise coincided with exams writing in most of the schools and this somehow disorganized the school program.

2.3 *General Observation*

- i. There is poor record management in most schools with admission books, school registers and attendance registers not updated or nonexistent. There was also lack of notice boards. Most of the schools visited were very poor at record keeping. This is mainly due to lack of adequate space; knowledge and skills in record keeping and adequate materials (i.e files) to use. Most students didn't have their records at school and this consequently jeopardizes the credibility of the eligibility criteria of the program.
- ii. There is absenteeism by both teachers and students especially in rural schools due to poor inspection and supervision.
- iii. Ownership of the exercise by the District Education Office was lacking in most LGs. Most of the education officers sited lack of awareness as a reason for not fully being involved in the exercise. In addition, some also complained of not having got facilitation for the exercise.
- iv. In Karamoja and some parts of Northern Uganda there is likelihood of double sponsorship as FAWE and other donors are sponsoring a good number of students.
- v. There is usually insufficient communication by MOES about the UPPET/UPOLET head count exercise. This affects preparedness of school authorities, students and district officials. Some schools learnt about the exercise on the headcount day.
- vi. Overall the schools were not prepared for the exercise as most of the students lacked the basic requirements like birth certificates, identity cards, P.L.E results and recommendation letters from their former schools in case of transfers.
- vii. Schools continue to admit students from non USE schools directly into the USE system

3.0 **Conclusions and Recommendations on the monitoring exercise**

3.1 *Conclusion*

The successful implementation of UPPET has greatly benefited children from poor households by reducing their costs of secondary education, but the headcount revealed that there were many challenges. Large increases in enrolment have far reaching effects on resource allocation and on demand for capacity and supply of learning facilities. The headcount also highlighted insufficient classrooms and facilities, teaching/learning materials which, in turn, impact on the quality of education.

All in all, the exercise was successfully accomplished despite a few challenges identified above. For effective future implementation of this exercise, schools record keeping

should be improved; communication should be more effective and on time and above all the interchange of Enumerators from one district to another should be maintained.

3.2 *Recommendations*

- i. PLE results should be released together with the slips like it is the case with UCE and UACE. Recommendations are sometimes doubtable.
- ii. The arrangement of interchanging the Enumerators should continue to minimize the collusions between the enumerators and the school administration.
- iii. Head teacher welcomed the idea of posting two Enumerators because of the high enrolments
- iv. The schools should make identification for students in time.
- v. There is a need to also sensitize the parents about the importance of Head count as some parent refuse to give their children study documents
- vi. Communications about the requirements for Head count should be sent to schools earlier for better preparations.
- vii. There is a need to improve on the record keeping mechanisms at the school level.
- viii. The government should also begin looking at teachers needs since something has been achieved as far as investing in learners.
- ix. The Local government authorities commended the arrangement of interchanging the Enumerators between the neighboring districts and advised that this system should continue to minimize the collusions between the enumerators and the school administration to inflate enrolment figures.
- x. Headcount guidelines and requirements can be disseminated earlier during the selection exercise to give time to the schools to prepare and also solicit for the required documentation from both students and parents.
- xi. There should be a verification exercise of the data submitted to the headquarters after headcount exercise to ensure the authenticity of the data submitted in every school that is under the program.
- xii. There is need to institute a task force to coordinate and manage UPOLET and UPPET activities. This aims at harmonizing the activities of the programmes at sectoral and departmental level. The taskforce should be representative of the Private Secondary, Government Secondary, BTVET and Planning departments together with the Office of the President.
- xiii. Awareness of the headcount should be paramount. All key stakeholders need to be informed in time through various media so that they prepare for the exercise in time.
- xiv. The Local Government Education Offices should be fully integrated into the exercise especially at the technical level because they are the custodians of Education at the Local Government level.
- xv. MOES should put a condition on private schools to recruit enough teachers
- xvi. Schools that could not be located on the ground should be traced in other districts or be removed from the list of USE schools.

CHAPTER FOUR

4.0 *Challenges, Conclusion and Recommendations*

4.1 *Challenges and Constraints*

- i. Despite the observed positive developments in the USE/UPPET, the programme still faces a number of challenges and constraints which continue to undermine the full realization of the expected effects on the quality and efficiency of education service delivery. These, include socio-economic and regional disparities, the continued prevalence of poverty, high dropout and repetition rates, disease (especially HIV/AIDS), and limited participation of the local communities.
- ii. Although the current headcount enrolment data signifies the existence of near gender parity in USE, it actually masks a lot of socio-economic and regional disparities in education. For example, imbalances in gross enrolment ratios between rural and urban areas.
- iii. The substantial increase in enrolment following introduction of USE was not matched by an equivalent increase in teachers, classrooms and textbooks. This has negatively impacted the quality of education. Pupil classroom ratios are still high, thus underscoring the need for improvement in infrastructure development. There are imbalances in the quality of teachers and their distribution across areas; teachers in USE schools that are located in rural areas are largely not trained compared to teachers in schools that are located in urban areas.
- iv. Drop out and repetition rates are still high, largely due to the lack of tracking transfers and the zeal by parents to foster better performance by their children. HIV/AIDS (prevalence to both teachers and students) is also still looming and is considered to be one of the causes that are contributing to rising dropout rates, absenteeism, repetition and poor academic performance.
- v. Participation of local leaders and communities in the USE program is still limited; which impacts negatively on the sustainability of the USE program. Enlisting the genuine interest, motivation and participation of parents, local leaders and communities require greater efforts in raising awareness and building local capacities through sensitization.

4.2 *Conclusion*

UPPET policy is just in its fifth year of implementation. However, based on information from the head count findings, it is clear that it has achieved a lot in terms of increasing access to post primary education in the country particularly in rural schools scattered across the country. It's upon this background that the following suggestions and recommendations have been made to consolidate the achievements while addressing the challenges, risks and opportunities identified.

4.3 *Recommendations*

4.3.1 Policy Suggestions

Broadening service reach and improving the quality and efficiency of education will necessarily be an on-going long-term process involving awareness building, institutional liaison, capacity building, policy consultations, systems adjustment and operational action on several fronts and from a sector-wide perspective. However, there are a number of critical short-term policy suggestions including:

- i. It is important that mechanisms geared towards maintaining teachers in service as well as attracting new ones are put in place. In addition, USE has led to a large increase in enrolment, which has put pressure on limited available resources – teachers, classrooms, desks, and books –which naturally improves the quality of education offered.
- ii. Raising awareness of poverty related dropout and training teachers to identify students at risk of dropping out due to poverty would be a way of identifying students at the risk dropping out early and therefore interventions done at an early stage. Teachers could be trained to watch out for signs of malnutrition (such as under height and weight), identify children who do not have proper school learning materials, who have to work, or are from domestically unstable families.
- iii. A school health programme would help to reduce health inequity. Visits by doctors or local health workers to schools to check on students, and monitor indicators of their development such as height and weight should help to identify problems and ill health. This would help to boost daily attendance.
- iv. A school feeding programme designed together with parents given the poverty rates at had might help to improve attendance at school. If run properly, it would help to avoid undernourishment, micro nutrient deficiencies and poor performance in class among students of poor families who are in school.
- v. Extending the plan for providing free school books to students to include pens/pencils, note books, geometry boxes and school bags is essential to provide more equal access to education in schools, and to tackle silent exclusion. Reusable textbooks rather than worksheet-based readers would avoid the problem of used books being worthless to those who have to use them. Such books need to be durable so that they last several years.

4.3.2 Other recommendations

- i. Construction of more classrooms should be considered as an intervention to over subscription of the programme.
- ii. There is need to Introduce a scheme of service that will make USE/UPPET attractive and desirable over years through rigorous mobilization, sensitization and communication of UPPET policy and developments among the various segments of society.
- iii. Government and School management should work out jointly with the parents/guardians alternative ways for the latter to appreciate the government contribution and in turn contribute to the education of their children.
- iv. Government should consider seconding teachers to public private partnership schools.
- v. Government should use a multi-sectoral approach in addressing the causes of high dropout rate among USE students in particular.
- vi. There is need to conduct verification exercises and studies to determine;
 - Schools with unusual out-liers like schools that have huge increases or decreases in enrolment;
 - The reasons for dropping out of the USE/UPPET programme
 - The reasons for transfer from USE/UPPET programme
- vii. Government should liaise with MOFPED to consider exempting private schools implementing UPPET policy from paying taxes.
- viii. Government should come out on standards (size and materials) for construction and equipping of classrooms, laboratories, teachers' houses so as to rationalize use of scarce financial resources.
- ix. MoES should ensure that all schools provide students with opportunities for physical and social development in addition to academic, vocational, business and technical pursuit.

Annex 15 BTVET Headcount National Result Summary

BTVET/UPPET National Summary : All Institutions		Apr-13	
	Male	Female	Total
Y1 BTVET Eligible (Admitted within 4 - 28 Aggregate Range)	2,527	785	3,312
Total Counted in Y1	2,341	705	3,046
Proven Absentees in Y1	186	80	266
Aggregate 29-and above admitted	379	231	610
BTVET Share of Y1 Enrolment	79.5%	73.7%	78.1%
Gender Proportion of BTVET eligible YtudentY	76%	24%	
Total Enrolled (UPPET plus Non UPPET) in Term 1 - Y1	3,178	1,065	4,243
	Male	Female	Total
Y2 BTVET Eligible (Admitted within 4 - 28 Aggregate Range)	2,079	511	2,590
Total Counted in Y2 in	1,836	432	2,268
Proven Absentees in Y2	243	79	322
Aggregate 29-and above admitted	253	91	344
BTVET Share of Y2 Enrolment	82%	65%	78%
Gender Proportion	80%	20%	
Total Enrolled (UPPET plus Non UPPET) in Term 1 - Y2	2,534	786	3,320
Y3 BTVET Eligible (Admitted within 4 - 28 Aggregate Range)	1,856	448	2,304
Total Counted in Y3 in	1,634	382	2,016
Proven Absentees in Y3	222	66	288
Aggregate 29-and above admitted	261	105	366
BTVET Share of Y3 Enrolment	80%	64%	76%
Gender Proportion	81%	19%	
Total Enrolled (UPPET plus Non UPPET) in Term 1 - Y3	2,312	705	3,017
Y1-Y3 BTVET Eligible (Admitted within 4 - 28 Aggregate Range)	6,462	1,744	8,206
Total Enrolled (UPPET plus Non UPPET) in Term 1 - Y1-Y3	8,024	2,556	10,580
Y1&2 Aggregate 29-and above admitted	893	427	1,320
BTVET Share of Y1-Y3 Enrolment	81%	68%	78%
Gender Proportion of BTVET eligible Students	79%	24%	
	Male	Female	Total
BTVET UPOLET Eligible Y1	2,856	449	3,285
Total Counted in Y1 in	2,702	428	3,130
Proven Absentees in Y1	154	21	155
UPOLET Eligible Students' Share of Enrolment	61%	56%	60%
Gender Proportion of USE eligible students	87%	14%	
Total Enrolment (Overall UPOLET Plus Non UPOLET) Term 1 Y1	4,651	797	5,448
BTVET UPOLET Eligible Y2	2,434	413	2,847
Total Counted in Y2 in	2,248	382	2,630
Proven Absentees in Y2	186	31	217
UPOLET Eligible Students' Share of Enrolment	57%	53%	57%
Gender Proportion of USE eligible students	85%	15%	
Total Enrolment (Overall UPOLET Plus Non UPOLET) Term 1 Y2	4,244	779	5,023
Y1-Y2 BTVET UPOLET Eligible Students	5,290	862	6,132
Total Enrolled (UPPET plus Non UPPET) in Term 1 - Y1-Y2	8,895	1,576	10,471

Y1&2 admitted above required mark	41	4	45
BTJET UPOLET Share of Y1-Y2 Enrolment	59%	55%	59%
